

RESULTS REPORT/REPORT OF CHEMICAL ANALYSIS

Thessaloniki: 20.04.2021

TO : SRC Group smPC / Zeolite Clean

SUBJECT : Chemical analysis of received sample **Kiwi** for Pesticides Residues on the fresh sample, after the washing only with water and after with the washing method Zeolite Clean F&V

1. Sample shipment: SRC Group smPC
2. Sample received on: 20.04.2021
3. Sample Code: 210416-13
4. Sample Description: # **Kiwi** #
5. Condition of sample: Good.
6. Period of consideration: 16.04.2021-28.04.2021
7. Clint's Address:., Aridea, Greece

The sample was subjected to the following chemical analyses and the results are:

Chemical analysis on fresh sample				after the washing only with H2O	after the USE of NEW Zeolite Clean	after the USE of old (10/05/19) Zeolite Clean	% percentage of Cleanliness With Zeolite Clean	+% Better Cleanliness	Method of Analysis LC-MS-MS, Based on EN 15662 & SANTE/11945/2015
Parameters	Units	Results	Results	Results	Results	Results	+Results		
1. Deltamethrin	mg/Kg	0.091	0.050	0,032	0.044	182,96	+100,96		
2. Dimethomorph	mg/Kg	0.155	0.131	0,066	0.127	134,39	+116,07		
3. Imidacloprid	mg/Kg	0.225	0.169	0,093	0.164	143,10	+109,97		
4. Pirimiphos-Methyl	mg/Kg	0.162	0.077	0,038	0.058	191,35	+220,62		
5. Pyraclostrobin	mg/Kg	0.086	0.047	0,022	0.034	290.90	+207.93		

Conclusion:

Based on the above measurements, it was found that washing food with the preparation Zeolite, especially **Kiwi**, reduces the concentrations of active substances of pesticides to levels well below the maximum allowable limits (MPLs). It therefore makes these foods suitable and safe for consumption under Regulations EC 396/2005 and EC 178/2006.
